

The Results.com Software Platform

The World's Leading Business Management System

The 4 Best Management Practices —distilled from researching the greatest companies on the planet and seamlessly integrated into one amazing, virtual workplace

Imagine starting work every day with the same level of information used by the world's most successful businesses at your fingertips...right on your desktop...in one beautifully designed dashboard that includes:

1) One-Page Strategic Plan—this is your foundation document that, once you've set it up, will drive your entire business—giving clarity and direction to every member of your company as it cascades your strategy down throughout your entire organization.

2) Real-Time Goals, KPIs & Projects—every member of your team can track these (and their status) in real time, with data even pulled in automatically through integrations with your key information systems.

3) Integrated Meetings—simply click on your scheduled meeting and the agenda, along with every goal, KPI and project for every team member (and the status of each), is instantly loaded—tied directly to the agenda.

4) Integrated Collaboration—your threads and chats are linked directly to each metric and project, keeping everything organized and easy to find—letting you see a complete history of all the questions, discussions, decisions, and actions taken to advance your goals.

No other software platform in the world matches this—and you can be using it as soon as today.

Every business needs a competitive edge, and this can be yours—the tool that ties your organization together, giving daily clarity to your vision and strategies.

See the status of every Goal, KPI or Project at a glance

The RESULTS dashboard uses an easily understood color code for each metric to drive and improve the performance of every team member:
